

**HIGH-CFU MULTISPECIES
FORMULA**

LactoPrime™ Plus

Multispecies probiotic support for
carbohydrate-sensitive individuals†

LactoPrime™ Plus is a concentrated, broad-spectrum probiotic supplement supplying 7 *Lactobacillus* and 5 *Bifidobacterium* probiotic species researched to support gastrointestinal and immune health.† It is specifically formulated without inulin or other fermentable carbohydrates, making it suitable for carbohydrate-sensitive individuals or those adhering to restricted diets such as GAPS and FODMAP regimens.

Supports gastrointestinal and immune health†

The intestinal microbiota is a complex ecosystem containing over 400 bacterial species. When balanced with a diverse spectrum of healthy bacteria, this ecosystem, also called the intestinal microbiota, promotes healthy functioning of the gastrointestinal tract and immune system by protecting against overgrowth of bacteria and yeast, optimizing digestion, facilitating elimination of toxins, supporting healthy immune function, and favorably modulating inflammatory responses. LactoPrime™ Plus provides a spectrum of beneficial *Lactobacillus* and *Bifidobacterium* species to help support gastrointestinal and immune system health.†

Helps maintain healthy intestinal microbiota†

The delicate balance of healthy intestinal microbiota can be disrupted by many factors, including poor diet, stress, state of overall

health, aging, exposure to toxins, and/or use of antibiotics and certain other medications. Supplementing the diet with a diverse spectrum of probiotic species can help promote and support a healthy balance of intestinal microbiota. LactoPrime™ Plus supplies a spectrum of *Lactobacillus* and *Bifidobacterium* species selected based on clinical research supporting their individual roles in promoting optimal gastrointestinal function, a healthy inflammatory response, and ability to support a healthy and balanced microbiota.†

Compatible with GAPS and FODMAP dietary regimens†

LactoPrime™ Plus is formulated in a cellulose base without prebiotics, such

as inulin or fructooligosaccharides (FOS), or other fermentable carbohydrates. It is formulated for compatibility with the dietary restrictions of persons following the Gut and Psychology Syndrome Diet (GAPS) and FODMAP (Fermentable, Oligo-, Di- and Monosaccharides, and Polyols) Diet regimens, which restrict intake of disaccharides and polysaccharides and do not allow grains, lactose, or sucrose.†

- 25 billion CFU per vegetarian capsule
- Free of inulin, FOS, and other fermentable carbohydrates
- 12 *Lactobacillus* and *Bifidobacterium* probiotic species
